10.4 Aplastic Anemia*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I feel weak and get breathless quickly." **Objective** • Hb 7 g/dL • Pale • HR 110/min on exertion	**ACTUAL** Decreased activity tolerance related to reduced oxygen-carrying capacity as evidenced by weakness, exertional dyspnea and low hemoglobin.	• Manages self-care with rests and without breathlessness within 1 week.	• Group care so that she can rest between activities. • Give red cells as prescribed, with safety checks. • Check HR and SpO_2 during activity. • Give immunosuppressive therapy as prescribed and watch for side effects.	• Goal reached when ADL are tolerated.
Subjective • "My gums bleed when I brush." **Objective** • Platelets 15 × 10^9/L • Petechiae on the legs • Bleeding gums	**ACTUAL** Impaired oral mucous membrane integrity related to thrombocytopenia as evidenced by gingival bleeding.	• No active bleeding from the mouth within 48 hours.	• Use a soft toothbrush or sponge swabs. • Avoid alcohol-based mouthwash. • Give platelets as prescribed. • Avoid IM injections and rectal procedures.	• Met if the mouth stops bleeding.
Subjective *No specific complaint* **Objective** • Neutrophils 0.3 × 10^9/L • Central line in place	**RISK** Risk for infection as evidenced by risk factors: severe neutropenia and invasive line.	• No infection; any fever treated within 1 hour.	• Use protective isolation per policy. • Insist on strict hand hygiene. • Measure temperature 4-hourly; treat fever as neutropenic sepsis. • Inspect the line site daily.	• Achieved if no infection develops.
