11.8 Herpes Zoster (Shingles)*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "Burning pain on one side of my chest with blisters." **Objective** • Vesicular rash along one dermatome • Pain 7/10	**ACTUAL** Acute pain related to neural inflammation as evidenced by burning dermatomal pain.	• Pain at or below 3/10.	• Start antiviral therapy early, as prescribed. • Give analgesics and neuropathic drugs as ordered. • Apply cool compresses. • Advise loose cotton clothing.	• Outcome reached when pain is controlled.
Subjective • "The itching keeps me awake." **Objective** • Scratching • Sleep disturbed	**ACTUAL** Impaired physical comfort related to pruritus as evidenced by scratching and sleep disturbance.	• Less itching within 48 hours.	• Keep nails short. • Apply calamine or the prescribed lotion. • Give a nighttime antihistamine if prescribed.	• Considered met as itching lessens.
Subjective • Pregnant daughter-in-law lives in the household **Objective** • Open vesicles	**RISK** Risk for infection [transmission to others] as evidenced by risk factors: contact with vesicular fluid.	• No spread to people who are not immune.	• Keep the lesions covered. • Advise keeping away from pregnant women, newborns and immunosuppressed people until the lesions crust. • Reinforce hand hygiene.	• Goal reached if no transmission occurs.
