18.6 Bipolar Disorder (Manic Episode)*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I do not need sleep; I have great plans." **Objective** • Pressured speech • Sleeps 2 hours a night • Constantly active	**ACTUAL** Ineffective sleep pattern related to manic hyperactivity as evidenced by 2 hours of sleep and continuous activity.	• Sleeps at least 6 hours within 1 week.	• Cut down stimulation, especially in the evening. • Give the mood stabilizer and other medicines as prescribed. • Encourage quiet activities. • Record hours of sleep.	• Considered met as sleep improves.
Subjective • "I have no time to eat." **Objective** • Too busy to eat • Lost 3 kg	**ACTUAL** Inadequate nutritional intake related to hyperactivity and inattention to meals as evidenced by weight loss.	• Weight steady.	• Offer high-energy finger foods and drinks she can carry. • Chart intake. • Weigh twice a week.	• Goal reached if weight is stable.
Subjective *No specific complaint* **Objective** • Impulsive • Poor judgment • On lithium	**RISK** Risk for physical injury as evidenced by risk factors: impulsive behavior, exhaustion and potential lithium toxicity.	• No injury; lithium level in the therapeutic range.	• Set clear, consistent limits. • Check lithium levels and watch for toxicity: vomiting, tremor, confusion. • Keep fluid and sodium intake steady.	• Met if no injury occurs.
