5.13 Guillain-Barré Syndrome*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "My legs became weak and now my arms too." **Objective** • Ascending weakness • Vital capacity falling	**ACTUAL** Ineffective breathing pattern related to respiratory muscle weakness as evidenced by reduced vital capacity.	• Ventilation adequate; respiratory failure picked up early.	• Measure vital capacity as ordered. • Follow SpO_2 and the strength of his cough. • Prepare for ventilation if vital capacity falls further. • Give immunoglobulin or assist with plasmapheresis as ordered.	• Goal reached while breathing stays stable.
Subjective *No specific complaint* **Objective** • Cannot walk • Leg power 2/5	**ACTUAL** Impaired physical mobility related to neuromuscular weakness as evidenced by inability to walk.	• Joint mobility preserved, without contractures.	• Do passive ROM three times a day. • Turn every 2 hours. • Refer to physiotherapy.	• Met if no contractures form.
Subjective *No specific complaint* **Objective** • Immobile • On bed rest	**RISK** Risk for thrombosis as evidenced by risk factors: immobility.	• No DVT.	• Give prophylactic anticoagulation as ordered. • Apply compression devices. • Examine the calves daily.	• Achieved if no DVT develops.
