9.3 Traction*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I have been lying in the same position for days." **Objective** • Femoral skeletal traction • Movement restricted	**ACTUAL** Impaired physical mobility related to traction as evidenced by restricted movement.	• Keeps strength and joint function in the free limbs.	• Check that weights hang freely and ropes sit in the pulley tracks. • Do not remove or lift the weights unless ordered. • Keep the body aligned against the line of pull. • Encourage exercise of the free limbs.	• Considered met when traction is effective and joints stay mobile.
Subjective • "The pin sites are sore." **Objective** • Skeletal pins • Small amount of serous fluid	**ACTUAL** Acute pain related to traction pins and fracture as evidenced by reported soreness.	• Pain at or below 3/10.	• Give analgesia as prescribed. • Position for comfort within the limits of traction. • Clean the pin sites gently.	• Goal reached when pain is controlled.
Subjective *No specific complaint* **Objective** • Skeletal pins	**RISK** Risk for infection as evidenced by risk factors: skeletal pins penetrating skin and bone.	• Pin sites free of infection.	• Carry out pin-site care per policy. • Look for redness, pus and loosening. • Follow temperature.	• Met while pin sites stay clean.
