9.6 Total Hip Replacement*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Rates pain 6/10 **Objective** • Hip incision • Drain in place	**ACTUAL** Acute pain related to surgical trauma as evidenced by a pain score of 6/10.	• Pain at or below 3/10 within 24 hours.	• Give regular analgesia. • Apply cold therapy as ordered. • Give analgesia before exercise.	• Outcome reached when pain is controlled.
Subjective • "How should I sit and sleep?" **Objective** • New prosthesis • Crosses his legs in bed	**ACTUAL** Inadequate health knowledge related to hip precautions as evidenced by questioning.	• Describes and keeps to the hip precautions.	• Teach the precautions the surgeon has ordered (posterior approach: no hip flexion beyond 90°, no crossing the legs, no inward rotation). • Provide a raised toilet seat and a high chair. • Show him how to use dressing aids.	• Considered met when precautions are followed.
Subjective *No specific complaint* **Objective** • Major orthopaedic surgery • Less mobile	**RISK** Risk for thrombosis as evidenced by risk factors: hip arthroplasty and reduced mobility.	• No DVT.	• Give anticoagulation as prescribed. • Encourage ankle exercises every hour. • Mobilize early. • Examine the calves daily.	• Goal reached if DVT does not develop.
