12.5 Laryngectomy*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Writes, "How will I talk?" **Objective** • Total laryngectomy • Permanent tracheostoma	**ACTUAL** Impaired verbal communication related to removal of the larynx as evidenced by inability to speak.	• Makes his needs known by other means.	• Supply a writing board or a communication app. • Give him extra time to respond. • Refer to the speech and language therapist to discuss voice restoration.	• Outcome reached when needs are communicated.
Subjective • Points to the stoma and coughs **Objective** • Secretions at the stoma • Noisy breathing	**ACTUAL** Ineffective airway clearance related to increased secretions and altered airway as evidenced by secretions and noisy breathing.	• Airway stays clear.	• Suction when needed. • Humidify the air he breathes. • Clean the stoma and begin teaching him to do it himself.	• Considered met if the airway is clear.
Subjective *No specific complaint* **Objective** • Permanent stoma	**RISK** Risk for aspiration as evidenced by risk factors: open stoma (water and foreign bodies).	• Nothing is aspirated through the stoma.	• Teach him to cover the stoma in the shower. • Advise against swimming. • Use a stoma cover.	• Goal reached when he can state these precautions.
