13.3 Endometriosis*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "My periods are extremely painful." • Rates menstrual pain 8/10 **Objective** • Pelvic tenderness • Pain interferes with work	**ACTUAL** Chronic pain related to ectopic endometrial tissue as evidenced by severe cyclical pelvic pain.	• Pain at a level that lets her carry on daily activities.	• Give NSAIDs and hormonal therapy as prescribed. • Teach the use of heat and relaxation. • Suggest she keeps a pain diary.	• Goal reached when pain is manageable.
Subjective • "Will I be able to have children?" **Objective** • Married 3 years without conceiving • Tearful when fertility is discussed	**ACTUAL** Excessive anxiety related to concern about fertility as evidenced by questioning and worry.	• Understands her treatment and fertility options.	• Give accurate information. • Refer to a fertility specialist where appropriate.	• Met once she is informed.
Subjective *No specific complaint* **Objective** • On hormonal therapy • Worried about fertility	**RISK** Risk for situational inadequate self-esteem as evidenced by risk factors: chronic illness and threatened fertility.	• Keeps a positive view of herself and continues treatment.	• Explain the side effects of therapy and how to manage them. • Encourage her to talk about fertility. • Arrange follow-up.	• Achieved if self-appraisal stays positive and treatment continues.
