13.6 Sexually Transmitted Infections*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I have burning on passing urine and a discharge." • "Do I need to tell my partner?" **Objective** • Urethral discharge • Positive test for gonorrhea or chlamydia	**ACTUAL** Inadequate health knowledge related to treatment and transmission as evidenced by questioning.	• Before leaving, describes the treatment, partner notification and prevention.	• Explain the infection and why the full course matters. • Explain why the partner needs testing and treatment. • Advise abstinence until both have been treated. • Teach safer sex practices.	• Considered met when the plan is described.
Subjective • "I am ashamed; please do not tell anyone." **Objective** • Avoids eye contact • Tense	**ACTUAL** Excessive anxiety related to diagnosis, stigma and fear of disclosure as evidenced by shame and requests for secrecy.	• Reports less anxiety and trusts that care is confidential.	• Keep a non-judgmental approach. • Explain the rules on confidentiality. • Provide care in private.	• Goal reached when he is calmer.
Subjective *No specific complaint* **Objective** • Untreated partner • Inconsistent condom use	**RISK** Risk for infection [reinfection] as evidenced by risk factors: re-exposure to an untreated partner.	• No reinfection.	• Help with partner notification. • Arrange a test of cure where indicated. • Offer testing for other STIs, including HIV and hepatitis B.	• Met if reinfection does not occur.
