15.9 HELLP Syndrome*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I have pain under my right ribs." **Objective** • Right upper quadrant pain • Raised liver enzymes • Low platelets	**ACTUAL** Acute pain related to hepatic distension as evidenced by right upper quadrant pain.	• Pain at or below 3/10 within 2 hours.	• Give analgesia, avoiding NSAIDs. • Follow liver enzymes and platelets. • Report sudden severe pain, which may mean a liver hematoma. • Prepare for delivery.	• Goal reached when pain is controlled.
Subjective • "What is happening to me?" **Objective** • Anxious • Trembling	**ACTUAL** Excessive anxiety related to sudden serious illness as evidenced by questioning and fear.	• Less anxious.	• Explain the plan of care simply. • Let a support person stay. • Keep her informed about the baby.	• Met when she is calmer.
Subjective *No specific complaint* **Objective** • Platelets 60 × 10^9/L	**RISK** Risk for excessive bleeding as evidenced by risk factors: thrombocytopenia and hepatic dysfunction.	• No major bleeding.	• Follow platelets and clotting. • Check puncture sites. • Give platelets as prescribed.	• Achieved if no bleeding occurs.
