19.4 Occupational Health*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Workers say, "We do not wear masks; it is too hot." **Objective** • Dusty air in the factory • Workers coughing	**ACTUAL** Inadequate health knowledge related to occupational hazards and protective equipment as evidenced by non-use of masks.	• Workers wear protective equipment consistently.	• Teach the hazards of dust and chemicals. • Show how to wear masks and other protective equipment correctly. • Work with management to supply equipment suited to each task.	• Outcome reached when equipment is worn.
Subjective • "My back hurts after lifting." **Objective** • Heavy loads handled by hand • No lifting aids	**ACTUAL** Acute pain related to poor lifting technique as evidenced by back pain after work.	• Workers report less back pain within 4 weeks.	• Teach safe lifting and the use of aids. • Encourage rest breaks and stretching. • Refer workers whose pain persists.	• Considered met as pain decreases.
Subjective *No specific complaint* **Objective** • Machinery • Long shifts	**RISK** Risk for physical injury as evidenced by risk factors: unsafe machinery and fatigue.	• No workplace injuries during the monitoring period.	• Organize regular safety training. • Report hazards and see that they are corrected. • Provide first-aid training.	• Goal reached if no injuries occur.
