19.7 Disaster Nursing*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Survivors say, "We lost our homes; we do not know where to go." **Objective** • Families moved to shelters • Overcrowding; not enough water	**ACTUAL** Maladaptive community coping related to sudden disaster as evidenced by displacement and lack of organized resources.	• Basic needs met and services organized within days.	• Take part in triage and first aid. • Coordinate shelter, water and food with relief agencies. • Set up health surveillance. • Identify vulnerable groups: children, pregnant women, older adults, people with disabilities.	• Achieved once services are organized.
Subjective • "I cannot stop thinking about what happened." **Objective** • Survivors distressed and sleeping poorly • Children clinging to parents	**ACTUAL** Post-trauma syndrome related to the disaster experience as evidenced by intrusive thoughts and insomnia.	• Survivors receive psychological first aid within days.	• Give psychological first aid. • Help reunite families. • Refer severe cases to mental health services.	• Outcome reached once support has been provided.
Subjective *No specific complaint* **Objective** • Overcrowded shelters • Unsafe water	**RISK** Risk for infection as evidenced by risk factors: crowding and poor sanitation.	• No outbreaks in the shelters.	• Work for safe water and sanitation. • Keep immunization services running. • Carry out outbreak surveillance.	• Considered met if no outbreaks occur.
