8.10 Cushing's Syndrome*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "My face is round and I bruise easily." **Objective** • Moon face • Truncal obesity • Thin skin • Raised glucose	**ACTUAL** Disrupted body image related to changes in appearance as evidenced by distress about face and body shape.	• Voices her feelings and understands that the changes can be treated.	• Encourage her to say how she feels. • Explain the improvement expected with treatment.	• Outcome reached when she shows signs of acceptance.
Subjective • "My ankles are swollen." **Objective** • Edema • Low potassium	**ACTUAL** Excessive fluid volume related to sodium retention as evidenced by edema.	• Less edema within 1 week.	• Weigh daily. • Encourage a low-sodium diet. • Follow potassium.	• Considered met as edema decreases.
Subjective *No specific complaint* **Objective** • Hypercortisolism • Thin skin that heals slowly	**RISK** Risk for infection as evidenced by risk factors: immunosuppression from cortisol excess.	• No infection.	• Teach hand hygiene. • Look for subtle signs of infection, since fever may be absent. • Protect the skin from injury.	• Goal reached if no infection develops.
