11.7 Skin Grafts*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "When can I move my leg?" **Objective** • Split-thickness graft on the leg • Bed rest ordered	**ACTUAL** Impaired physical mobility related to immobilization of the graft site as evidenced by prescribed bed rest.	• Graft takes; mobilizes when permitted.	• Keep the graft site still, as ordered. • Protect the graft from pressure and shear. • Elevate the leg. • Teach exercises for the other limbs.	• Goal reached when the graft is taking.
Subjective • "The donor site hurts more than the graft." **Objective** • Donor site on the thigh • Guards the thigh	**ACTUAL** Acute pain related to the donor-site wound as evidenced by reported pain.	• Pain at or below 3/10.	• Give analgesia as prescribed. • Leave the donor dressing in place per protocol. • Position him so that the donor site is not pressed on.	• Met when pain is controlled.
Subjective *No specific complaint* **Objective** • Graft and donor sites	**RISK** Risk for infection as evidenced by risk factors: two open wounds.	• Graft takes and neither site becomes infected.	• Watch for odor, discharge and fever. • Use aseptic technique for dressings. • Check the graft's color and adherence.	• Achieved if no infection develops.
