19.1 Home Care After Discharge*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Wife says, "I do not know how to change his dressing or give his injections." **Objective** • Sent home with a wound and on insulin • Wife is the main caregiver • Medicines stored incorrectly	**ACTUAL** Inadequate health knowledge [caregiver] related to home care procedures as evidenced by questioning and incorrect medicine storage.	• Within three home visits, the caregiver does the wound care and injections correctly.	• Assess the home and what the caregiver can manage. • Teach each procedure and watch her do it back. • Give a written medicine schedule. • Arrange regular home visits and leave contact numbers.	• Considered met when the procedures are done correctly.
Subjective • "The house is not suitable for a wheelchair." **Objective** • Steps at the entrance • Bathroom too small for a wheelchair	**ACTUAL** Ineffective home maintenance behaviors related to environmental barriers and reduced mobility as evidenced by an unsuitable home layout.	• Family make basic changes to the home within 2 weeks.	• Recommend ramps, grab bars and taking up rugs. • Refer to occupational therapy and social services.	• Goal reached once the changes are made.
Subjective *No specific complaint* **Objective** • Patient depends on others for care • One caregiver	**RISK** Risk for excessive caregiving burden as evidenced by risk factors: high care demands and insufficient support.	• Caregiver names sources of respite.	• Assess the caregiver's health and stress. • Bring in other family members. • Link the family to community services.	• Met when respite is identified.
