19.5 Communicable Disease Control*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Residents report, "Many children have diarrhea this week." **Objective** • Cluster of diarrhea cases • Unsafe water supply	**ACTUAL** Ineffective community health management related to unsafe water and sanitation as evidenced by a cluster of diarrhea cases.	• Fewer new cases within 2 weeks.	• Notify the public health authorities. • Teach boiling or chlorinating water. • Hand out oral rehydration salts and teach how to make them up. • Teach hand hygiene and safe food handling.	• Met as cases decline.
Subjective • "Vaccines are not necessary." **Objective** • Low immunization coverage • Rumors that vaccines cause harm	**ACTUAL** Inadequate health knowledge related to the benefits of immunization as evidenced by vaccine refusal.	• More children vaccinated within 3 months.	• Give clear information. • Engage community leaders. • Organize outreach sessions.	• Achieved as uptake increases.
Subjective *No specific complaint* **Objective** • Community outbreak	**RISK** Risk for infection as evidenced by risk factors: ongoing community transmission.	• Outbreak controlled within 4 weeks.	• Carry out case finding and contact tracing. • Advise on isolation. • Report cases to the public health authorities.	• Outcome reached once the outbreak is controlled.
