3.7 Lung Cancer*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I get breathless and sometimes cough blood." **Objective** • SpO_2 90% • Hemoptysis • Air entry reduced on one side	**ACTUAL** Impaired gas exchange related to airway obstruction by tumor as evidenced by hypoxemia and dyspnea.	• SpO_2 on target and less breathlessness reported.	• Position him so that the lungs can expand fully. • Give oxygen as prescribed. • Measure any hemoptysis and report an increase. • Teach breathing control.	• Considered met at target SpO_2.
Subjective • "I worry about what will happen to my family." **Objective** • Tearful • Insomnia	**ACTUAL** Excessive anxiety related to a cancer diagnosis and an uncertain future as evidenced by worry and insomnia.	• Talks about his feelings and reports feeling less anxious.	• Make time to talk. • Give accurate information about the treatment plan. • Involve the family and psychological support services.	• Goal reached when he reports less anxiety.
Subjective *No specific complaint* **Objective** • Tumor invading blood vessels • May need anticoagulation	**RISK** Risk for excessive bleeding as evidenced by risk factors: tumor erosion of blood vessels.	• No massive hemoptysis; any bleeding is picked up early.	• Record every episode of hemoptysis. • Follow the hemoglobin. • Keep suction at the bedside. • Report increased bleeding at once.	• Met if no major bleed occurs.
