10.17 Breast Cancer and Mastectomy

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I do not want to see my chest." **Objective** • Had a mastectomy 2 days ago • Looks away when the dressing is changed	**ACTUAL** **Disturbed body image** related to loss of a breast as evidenced by refusal to look at the surgical site.	Before discharge, looks at the incision and talks about her options.	• Let her talk about how she feels. • Offer to be there with her the first time she looks. • Talk about a prosthesis and reconstruction. • Offer to put her in touch with a support group.	Looks at the site and discusses her options: **goal met**.
Subjective • Gives the pain 5/10 **Objective** • Incision on the chest • Wound drain in situ	**ACTUAL** **Acute pain** related to surgical tissue trauma as evidenced by pain score 5/10.	Pain 3/10 or less.	• Give analgesia as prescribed. • Rest her arm on a pillow. • Check the drain is working and record the output.	Pain controlled: **goal met**.
Subjective • *No specific complaint* **Objective** • Axillary lymph nodes removed	**RISK** **Risk for infection** as evidenced by risk factors: axillary node removal with impaired lymph drainage of the arm.	No infection or lymphedema in the arm.	• No BP readings, injections or blood tests on that arm. • Teach the arm exercises she has been shown. • Teach skin care and how to protect the arm from cuts and burns. • Tell her to report any swelling or redness in the arm.	No infection or swelling: **goal met**.
