10.5 Leukemia

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I have fever and feel very tired." **Objective** • Neutrophils 0.4 × 10^9/L • Temperature 38.3 °C • Having induction chemotherapy	**ACTUAL** **Hyperthermia** related to infection during neutropenia as evidenced by temperature 38.3 °C and low neutrophil count.	Gets IV antibiotics within 1 hour of the fever and is afebrile within 72 hours.	• Following the neutropenic sepsis protocol, take blood cultures and give IV antibiotics within 1 hour. • Vital signs every 1–2 hours. • Keep him in protective isolation. • No rectal temperatures or rectal procedures.	Afebrile and stable: **goal met**.
Subjective • "My mouth is sore and I cannot eat." **Objective** • Mouth ulcers • Eating less • Swallowing hurts	**ACTUAL** **Impaired oral mucous membrane integrity** related to chemotherapy as evidenced by oral ulcers and pain on eating.	Within 5 days, says his mouth is more comfortable and is eating more.	• Look in his mouth every day. • Mouth care with a soft brush and the prescribed rinse after meals and at bedtime. • Give the analgesic mouthwash before meals. • Offer soft, cool, bland food.	More comfortable, eating more: **goal met**.
Subjective • *No specific complaint* **Objective** • Platelets 18 × 10^9/L	**RISK** **Risk for bleeding** as evidenced by risk factors: thrombocytopenia from disease and chemotherapy.	No major bleeding.	• Bleeding precautions in place. • Check platelets every day. • Give the platelet transfusion as prescribed. • Report headache or confusion (could be bleeding in the head).	No major bleeding: **goal met**.
