10.6 Lymphoma

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I sweat at night and I have lost weight." **Objective** • Lost 6 kg in 2 months • Lymph nodes in the neck enlarged • Albumin low	**ACTUAL** **Imbalanced nutrition: less than body requirements** related to increased metabolic demand and reduced appetite as evidenced by weight loss.	Weight steady through treatment.	• Assess his nutrition and refer to the dietitian. • Offer high-calorie supplements. • Control nausea with the prescribed antiemetics. • Weigh once a week.	Weight steady: **goal met**.
Subjective • "What will chemotherapy do to me?" • "Can I continue working?" **Objective** • Tense • Has slept badly since the diagnosis	**ACTUAL** **Anxiety** related to diagnosis and planned treatment as evidenced by questions and insomnia.	Says he understands the treatment plan and feels less anxious.	• Explain the treatment schedule and the usual side effects. • Give written information. • Invite questions and include the family. • Offer psychological support.	Less anxious: **goal met**.
Subjective • *No specific complaint* **Objective** • On chemotherapy • On steroids	**RISK** **Risk for infection** as evidenced by risk factors: immunosuppression from treatment.	No infection.	• Teach hand hygiene and food safety. • Tell him to report a temperature of 38 °C or more straight away. • He should stay away from crowds while his counts are low.	No infection: **goal met**.
