12.5 Laryngectomy

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Writes • "How will I talk?" **Objective** • Total laryngectomy • Permanent tracheostoma	**ACTUAL** **Impaired verbal communication** related to removal of the larynx as evidenced by inability to speak.	Gets his needs across by other means.	• Give him a writing board or a communication app. • Give him extra time. • Refer to the speech therapist to discuss ways of restoring his voice.	Gets his needs across: **goal met**.
Subjective • Points to the stoma and coughs **Objective** • Secretions coming from the stoma • Breathing noisy	**ACTUAL** **Ineffective airway clearance** related to increased secretions and altered airway as evidenced by secretions and noisy breathing.	Airway stays clear.	• Suction as needed. • Humidify the air he breathes. • Clean the stoma and teach him to care for it himself.	Airway clear: **goal met**.
Subjective • *No specific complaint* **Objective** • Permanent stoma	**RISK** **Risk for aspiration** as evidenced by risk factors: open stoma (water, foreign bodies).	No aspiration through the stoma.	• Teach him to cover the stoma in the shower. • He must not go swimming. • Use a stoma cover.	States the precautions: **goal met**.
