13.6 Sexually Transmitted Infections

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I have burning on passing urine and a discharge." • "Do I need to tell my partner?" **Objective** • Urethral discharge • Tested positive for gonorrhea or chlamydia	**ACTUAL** **Deficient knowledge** related to treatment and transmission as evidenced by questions.	Before leaving, can explain the treatment plan, partner notification and prevention.	• Explain the infection and why the treatment must be finished. • Explain why the partner needs testing and treatment. • No intercourse until both partners have been treated. • Teach safe sex.	Describes the plan: **goal met**.
Subjective • "I am ashamed; please do not tell anyone." **Objective** • Will not make eye contact • Tense	**ACTUAL** **Anxiety** related to diagnosis, stigma and fear of disclosure as evidenced by shame and request for secrecy.	Says he feels less anxious and trusts that care is confidential.	• Do not judge. • Explain the rules on confidentiality. • Give care in private.	Calmer: **goal met**.
Subjective • *No specific complaint* **Objective** • Partner not treated • Does not always use condoms	**RISK** **Risk for infection** as evidenced by risk factors: re-exposure to an untreated partner.	No reinfection.	• Help with notifying the partner. • Arrange a test of cure where needed. • Offer tests for other STIs, including HIV and hepatitis B.	No reinfection: **goal met**.
