15.13 Premature Rupture of Membranes

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "Water is leaking from me." **Objective** • Clear fluid leaking • Not contracting • Anxious	**ACTUAL** **Anxiety** related to rupture of membranes as evidenced by worry.	Says she feels less anxious.	• Explain the plan of care. • Explain how she will be watched for infection and for labor. • Invite her questions.	Calmer: **goal met**.
Subjective • "What should I watch for?" **Objective** • PROM at 35 weeks • Cannot name the warning signs	**ACTUAL** **Deficient knowledge** related to signs of infection as evidenced by questions.	Before discharge or transfer, can name the warning signs.	• Tell her to report fever, fluid that smells bad, and abdominal pain. • Tell her to report if the baby moves less. • Show her how to check her pads.	Names them: **goal met**.
Subjective • *No specific complaint* **Objective** • Membranes ruptured	**RISK** **Risk for infection** as evidenced by risk factors: ruptured membranes (chorioamnionitis).	No infection.	• No digital vaginal examinations. • Watch her temperature and the fetal heart. • Give antibiotics as prescribed.	No infection: **goal met**.
