15.9 HELLP Syndrome

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I have pain under my right ribs." **Objective** • Pain in the right upper quadrant • Liver enzymes raised • Platelets low	**ACTUAL** **Acute pain** related to liver distension as evidenced by right upper quadrant pain.	Pain 3/10 or less within 2 hours.	• Give analgesia, but no NSAIDs. • Follow liver enzymes and platelets. • Sudden severe pain must be reported (could be a liver hematoma). • Get her ready for delivery.	Controlled: **goal met**.
Subjective • "What is happening to me?" **Objective** • Anxious • Shaking	**ACTUAL** **Anxiety** related to sudden serious illness as evidenced by questions and fear.	Says she feels less anxious.	• Explain the plan of care in simple words. • Let a support person stay. • Keep her told about how the baby is doing.	Calmer: **goal met**.
Subjective • *No specific complaint* **Objective** • Platelets 60 × 10^9/L	**RISK** **Risk for bleeding** as evidenced by risk factors: thrombocytopenia and liver dysfunction.	No major bleeding.	• Follow platelets and clotting. • Watch the puncture sites. • Give platelets as prescribed.	No bleeding: **goal met**.
