17.18 Accidental Poisoning in Children

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Mother says • "He drank something from the cupboard." **Objective** • Drank an unknown liquid • Medicines and chemicals within the child's reach at home	**ACTUAL** **Deficient knowledge (parent)** related to safe storage of medicines and chemicals as evidenced by hazardous home storage.	Before discharge, the parent can explain how to store things safely.	• Teach her to keep medicines and chemicals locked away and out of reach. • Keep products in their original containers. • Give her the poison information number.	Explains the measures: **goal met**.
Subjective • Mother says • "It is my fault." **Objective** • Mother crying • Blames herself	**ACTUAL** **Anxiety (parent)** related to child's poisoning and guilt as evidenced by crying and self-blame.	Mother talks about her feelings and feels supported.	• Support her without judging. • Keep her informed.	Calmer: **goal met**.
Subjective • *No specific complaint* **Objective** • Toddler who explores everything • Things stored unsafely	**RISK** **Risk for poisoning** as evidenced by risk factors: accessible medicines and chemicals at home.	No further poisoning.	• Teach safety at home. • Book follow-up. • Teach the use of child-resistant containers.	No repeat: **goal met**.
