Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Mother says • "He screams and draws his legs up, then is quiet." **Objective** • Colicky pain that comes and goes • "Red currant jelly" stool • Sausage-shaped mass felt	**ACTUAL** **Acute pain** related to bowel obstruction as evidenced by episodic screaming and drawing up of legs.	Pain relieved after reduction.	• Give analgesia as prescribed. • Nothing by mouth. • Get him ready for air or contrast enema reduction, or surgery.	Pain relieved: **goal met**.
Subjective • Mother says • "He keeps vomiting." **Objective** • Vomiting • Lethargic	**ACTUAL** **Deficient fluid volume** related to vomiting and bowel fluid sequestration as evidenced by lethargy and dry mucosa.	Rehydrated within 8 hours.	• Give IV fluids as prescribed. • Keep an I&O chart. • Watch vital signs.	Rehydrated: **goal met**.
Subjective • *No specific complaint* **Objective** • Bowel ischemic • Abdomen distended	**RISK** **Risk for shock** as evidenced by risk factors: bowel ischemia and perforation.	Vital signs stay stable.	• Watch vital signs. • Report abdominal distension, fever or blood in the stool. • If reduction does not work, get him ready for surgery.	Stable: **goal met**.
