18.13 Borderline Personality Disorder

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "Everyone abandons me." • "I cut myself when I feel empty." **Objective** • Old and new superficial cuts on the forearm • Mood changes quickly	**ACTUAL** **Ineffective impulse control** related to intense emotions as evidenced by self-injury and rapid mood changes.	Uses other ways of coping when distressed.	• Keep boundaries clear and the same. • Help her recognise her triggers and early warning signs. • Support the skills she learns in dialectical behaviour therapy. • If she self-injures, respond calmly and without punishment.	Uses alternatives: **goal met**.
Subjective • "The day staff are good, the night staff are bad." **Objective** • Relationships unstable • Plays staff off against each other (splitting)	**ACTUAL** **Ineffective coping** related to emotional instability as evidenced by unstable relationships.	Keeps steady relationships with staff.	• The whole team takes the same approach. • Agree one care plan that every member of staff follows. • Set clear boundaries, kindly.	Consistent: **goal met**.
Subjective • *No specific complaint* **Objective** • Has self-injured before	**RISK** **Risk for self-mutilation** as evidenced by risk factors: history of self-injury and emotional distress.	Stays safe.	• Assess her risk regularly. • Remove dangerous items as policy says. • Agree a safety plan with her.	Safe: **goal met**.
