18.9 Aggressive Behaviour

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "Leave me alone or I will hit you." **Objective** • Shouting, fists clenched • Pacing up and down	**ACTUAL** **Ineffective impulse control** related to anger and poor coping as evidenced by threats and agitation.	Expresses his anger in words.	• Approach calmly, with an open posture, and keep a safe distance. • De-escalate: listen, acknowledge his feelings, give him choices. • Cut down stimulation and move other people away. • Give medication as prescribed if it is needed.	Expresses anger safely: **goal met**.
Subjective • "Nobody listens to me." **Objective** • Frustrated • Shouts when he does not get what he asks for	**ACTUAL** **Ineffective coping** related to frustration as evidenced by aggressive outbursts.	Can name two other ways to deal with his anger.	• Once he is calm, talk about what set him off. • Teach anger management techniques. • Praise him when he uses them.	Uses the alternatives: **goal met**.
Subjective • *No specific complaint* **Objective** • Has been violent before	**RISK** **Risk for other-directed violence** as evidenced by risk factors: history of violence and current agitation.	No harm to himself or anyone else.	• Use restraint or seclusion only as a last resort, and only as policy allows. • Document his behaviour and what was done. • Debrief after any incident.	No harm: **goal met**.
