19.4 Occupational Health

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Workers say • "We do not wear masks; it is too hot." **Objective** • Factory air is dusty • Workers coughing	**ACTUAL** **Deficient knowledge** related to occupational hazards and protective equipment as evidenced by not using masks.	Workers wear their protective equipment every time.	• Teach the dangers of dust and chemicals. • Show how to wear masks and protective equipment properly. • Work with management to provide equipment that suits the job.	Equipment worn: **goal met**.
Subjective • "My back hurts after lifting." **Objective** • Lifting heavy loads by hand • No lifting aids	**ACTUAL** **Acute pain** related to poor lifting technique as evidenced by back pain after work.	Within 4 weeks, workers report less back pain.	• Teach safe lifting and how to use aids. • Encourage breaks and stretching. • Refer anyone whose pain does not settle.	Less pain: **goal met**.
Subjective • *No specific complaint* **Objective** • Machinery • Long shifts	**RISK** **Risk for injury** as evidenced by risk factors: unsafe machinery and fatigue.	No injuries at work during the monitoring period.	• Promote safety training. • Report hazards and get them fixed. • Provide first aid training.	No injuries: **goal met**.
