19.7 Disaster Nursing

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Survivors say • "We lost our homes; we do not know where to go." **Objective** • Families displaced into shelters • Crowded, not enough water	**ACTUAL** **Ineffective community coping** related to sudden disaster as evidenced by displacement and lack of organized resources.	Within days, basic needs met and services organised.	• Take part in triage and first aid. • Work with relief agencies on shelter, water and food. • Set up health surveillance. • Identify the most vulnerable: children, pregnant women, older adults, disabled people.	Services organised: **goal met**.
Subjective • "I cannot stop thinking about what happened." **Objective** • Survivors distressed and not sleeping • Children clinging to their parents	**ACTUAL** **Post-trauma syndrome** related to disaster experience as evidenced by intrusive thoughts and insomnia.	Within days, survivors receive psychological first aid.	• Give psychological first aid. • Bring families back together. • Refer severe cases to mental health services.	Support given: **goal met**.
Subjective • *No specific complaint* **Objective** • Shelters crowded • Water unsafe	**RISK** **Risk for infection** as evidenced by risk factors: crowding and poor sanitation.	No outbreaks in the shelters.	• Promote safe water and sanitation. • Keep immunisation services running. • Watch for outbreaks.	No outbreaks: **goal met**.
