4.9 Permanent Pacemaker

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I am afraid to move my arm." **Objective** • New pacemaker in the left chest • Keeps the arm completely still	**ACTUAL** **Deficient knowledge** related to care after pacemaker insertion as evidenced by questions and fear of moving.	Before discharge, can state his activity limits and pacemaker precautions.	• For the period advised, he should not lift the arm above shoulder level. • Teach him to check his pulse and always carry his pacemaker card. • Tell him to keep mobile phones away from the device and to tell staff before an MRI or a security check. • Book device follow-up.	States the precautions: **goal met**.
Subjective • Gives pain at the insertion site 5/10 **Objective** • Site slightly swollen • Guards his left shoulder	**ACTUAL** **Acute pain** related to surgical insertion as evidenced by reported pain.	Pain 3/10 or less.	• Give analgesia as prescribed. • If ordered, put a cold pack on the site. • Support the arm in a comfortable position. • Check the site for a hematoma.	Pain controlled: **goal met**.
Subjective • *No specific complaint* **Objective** • Implanted device and incision	**RISK** **Risk for infection** as evidenced by risk factors: surgical incision and implanted device.	Site heals with no infection.	• Keep the dressing dry. • Watch for redness, swelling, discharge and fever. • Give the prophylactic antibiotic as ordered.	Site clean: **goal met**.
