5.20 The Unconscious Patient

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • *No specific complaint* **Objective** • GCS 7 • Snoring breaths • Secretions pooling	**ACTUAL** **Ineffective airway clearance** related to decreased level of consciousness as evidenced by snoring and pooled secretions.	Airway stays patent.	• Lay him on his side or raise the head of the bed. • Put in an airway adjunct if needed. • Suction as needed. • Watch SpO_2.	Airway clear: **goal met**.
Subjective • Family ask how they can help with his care **Objective** • Cannot do any self-care • GCS 7	**ACTUAL** **Bathing self-care deficit** related to unconsciousness as evidenced by total dependence.	Skin, eyes and mouth stay clean and intact.	• Give full hygiene care. • Give eye care so the cornea is not damaged. • Mouth care every 4 hours. • If the family want to, let them help with care.	Skin, eyes and mouth clean: **goal met**.
Subjective • *No specific complaint* **Objective** • Immobile • Incontinent	**RISK** **Risk for adult pressure injury** as evidenced by risk factors: immobility and incontinence.	Skin stays intact.	• Turn every 2 hours. • After incontinence, clean the skin and keep it dry. • Nurse him on a pressure-redistributing mattress.	Skin intact: **goal met**.
