7.9 Arteriovenous Fistula Care

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "What should I do to protect my fistula?" **Objective** • New • AV fistula, left arm • Wears a tight watch on that arm	**ACTUAL** **Deficient knowledge** related to fistula care as evidenced by questions.	Can describe how to protect the fistula.	• Teach him to feel for the thrill every day. • No BP readings, blood tests or tight clothing on that arm. • He should not sleep on that arm or carry heavy bags with it.	Describes the measures: **goal met**.
Subjective • Gives pain at the site 4/10 **Objective** • Swollen after surgery • Guards the arm	**ACTUAL** **Acute pain** related to surgical creation of fistula as evidenced by reported pain.	Pain 3/10 or less.	• Rest the arm up on a pillow. • Give analgesia as prescribed. • Check the thrill and the circulation in the hand.	Controlled: **goal met**.
Subjective • *No specific complaint* **Objective** • Vein now arterialised • Needled again and again	**RISK** **Risk for bleeding** as evidenced by risk factors: arterialized vein and needling.	No bleeding or clotting in the fistula.	• Teach him to press firmly once the needle is out. • Tell him to report if the thrill is gone or if it bleeds. • Check the thrill and bruit every shift.	No bleeding: **goal met**.
