9.3 Traction

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I have been lying in the same position for days." **Objective** • Skeletal traction on the femur • Cannot move much	**ACTUAL** **Impaired physical mobility** related to traction as evidenced by restricted movement.	Muscle strength and joint function kept in the limbs that are not in traction.	• Weights must hang freely, with the ropes running in the pulley tracks. • Never take off or lift the weights unless it is ordered. • Keep his body aligned against the line of pull. • Encourage exercise of the free limbs.	Traction working and joints mobile: **goal met**.
Subjective • "The pin sites are sore." **Objective** • Skeletal pins A little serous ooze	**ACTUAL** **Acute pain** related to traction pins and fracture as evidenced by reported soreness.	Pain 3/10 or less.	• Give analgesia as prescribed. • Make him comfortable within the limits of the traction. • Be gentle when doing pin-site care.	Controlled: **goal met**.
Subjective • *No specific complaint* **Objective** • Skeletal pins	**RISK** **Risk for infection** as evidenced by risk factors: skeletal pins penetrating skin and bone.	No infection at the pin sites.	• Pin-site care as policy says. • Look for redness, pus and loose pins. • Watch his temperature.	Pin sites clean: **goal met**.
