9.6 Total Hip Replacement

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Gives the pain 6/10 **Objective** • Incision over the hip • Drain in situ	**ACTUAL** **Acute pain** related to surgical trauma as evidenced by pain score 6/10.	Pain 3/10 or less within 24 hours.	• Give analgesia regularly. • Cold packs as ordered. • Give analgesia before exercise.	Controlled: **goal met**.
Subjective • "How should I sit and sleep?" **Objective** • New prosthesis • Crosses his legs in bed	**ACTUAL** **Deficient knowledge** related to hip precautions as evidenced by questions.	Can describe the hip precautions and sticks to them.	• Teach the precautions the surgeon orders (for a posterior approach: no bending the hip beyond 90°, no crossing the legs, no turning the leg inwards). • Use a raised toilet seat and a high chair. • Show him how to use dressing aids.	Follows the precautions: **goal met**.
Subjective • *No specific complaint* **Objective** • Had major orthopaedic surgery • Moving less	**RISK** **Risk for thrombosis** as evidenced by risk factors: hip replacement and reduced mobility.	No DVT.	• Give the anticoagulant as prescribed. • Every hour, encourage ankle exercises. • Get him moving early. • Check the calves every day.	No DVT: **goal met**.
