15.13 Premature Rupture of Membranes*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "Water is leaking from me." **Objective** • Clear fluid leaking • No contractions • Anxious	**ACTUAL** Excessive anxiety related to rupture of membranes as evidenced by worry.	• Less anxious.	• Explain the plan of care. • Explain how she will be watched for infection and labor. • Invite questions.	• Achieved when she is calmer.
Subjective • "What should I watch for?" **Objective** • PROM at 35 weeks • Cannot name the warning signs	**ACTUAL** Inadequate health knowledge related to signs of infection as evidenced by questioning.	• Names the warning signs before discharge or transfer.	• Tell her to report fever, bad-smelling fluid or abdominal pain. • Tell her to report fewer fetal movements. • Show her how to check her pads.	• Outcome reached when the signs are named.
Subjective *No specific complaint* **Objective** • Ruptured membranes	**RISK** Risk for infection as evidenced by risk factors: rupture of amniotic membranes (chorioamnionitis).	• No infection.	• Avoid digital vaginal examinations. • Follow temperature and fetal heart. • Give antibiotics as prescribed.	• Considered met if no infection develops.
