19.3 School Health*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • Teacher reports, "Many children come to school without breakfast and complain of headaches." **Objective** • Low hemoglobin among pupils screened • Too few handwashing facilities	**ACTUAL** Ineffective community health management related to limited school health programs as evidenced by anemia and inadequate hygiene facilities.	• Within one term, the school starts a health education and screening program.	• Assess the school's health needs with the staff. • Organize screening for vision, hearing, growth and anemia. • Give hygiene and nutrition education suited to each age group. • Work with parents and the school administration.	• Goal reached once the program has started.
Subjective • Pupils say, "We do not know how to wash hands properly." **Objective** • Handwashing done incorrectly • No soap in the toilets	**ACTUAL** Inadequate health knowledge related to hand hygiene as evidenced by incorrect technique.	• Pupils show correct handwashing.	• Demonstrate the steps of handwashing. • Use songs or posters. • Press for soap and water to be provided.	• Met when pupils demonstrate correctly.
Subjective *No specific complaint* **Objective** • Crowded classrooms • Poor sanitation	**RISK** Risk for infection as evidenced by risk factors: crowding and poor sanitation.	• School reports fewer absences due to infection.	• Check immunization status. • Teach respiratory hygiene. • Report outbreaks to the health authorities.	• Achieved as absence falls.
