2.21 Sleep Disturbance in Hospital*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "The noise wakes me up." **Objective** • Awake through the night • Drowsy by day	**ACTUAL** Ineffective sleep pattern related to environmental factors as evidenced by frequent awakening.	• At least 5 hours of sleep within 2 nights.	• Lower noise and lighting at night. • Cluster care activities. • Offer an eye mask or earplugs.	• Outcome reached as sleep improves.
Subjective • "I feel tired all day." **Objective** • Lethargic • Poor concentration	**ACTUAL** Excessive fatigue burden related to sleep deprivation as evidenced by reported tiredness and lethargy.	• Reports more energy and some daytime activity within 3 days.	• Limit daytime naps to 30–45 minutes. • Encourage light activity and sitting out of bed. • Open the curtains for daylight. • Consider other causes of tiredness, such as anemia or pain.	• Considered met when she describes having more energy.
Subjective *No specific complaint* **Objective** • Older adult • Sleep-deprived	**RISK** Risk for acute confusion as evidenced by risk factors: sleep deprivation and advanced age.	• Stays oriented.	• Check orientation. • Place a clock and calendar in view. • Encourage family to be present.	• Goal reached if orientation is preserved.
