4.9 Permanent Pacemaker*

Assessment	Nursing Diagnosis	Plan / Expected Outcome	Nursing Interventions	Evaluation
Subjective • "I am afraid to move my arm." **Objective** • New pacemaker, left chest • Keeps the arm completely still	**ACTUAL** Inadequate health knowledge related to care after pacemaker insertion as evidenced by questioning and fear of movement.	• Before discharge, lists activity limits and device precautions.	• Ask him not to lift the arm above shoulder height for the advised period. • Teach him to check his pulse and to carry the device card. • Advise keeping mobile phones away from the device and telling staff about it before MRI or security checks. • Arrange device follow-up.	• Met when he can state the precautions.
Subjective • Rates insertion-site pain 5/10 **Objective** • Slight swelling at the site • Guards the left shoulder	**ACTUAL** Acute pain related to surgical insertion as evidenced by reported pain.	• Pain at or below 3/10.	• Give analgesia as prescribed. • Apply a cold pack if ordered. • Support the arm comfortably. • Look for hematoma at the site.	• Achieved when pain is controlled.
Subjective *No specific complaint* **Objective** • Implanted device and incision	**RISK** Risk for infection as evidenced by risk factors: surgical incision and implanted device.	• Site heals without infection.	• Keep the dressing dry. • Watch for redness, swelling, discharge or fever. • Give prophylactic antibiotics as ordered.	• Outcome reached if the site stays clean.
